

Richard Davies

Graphic designer / Typesetter

Software Proficiency

Design Experience

I have over ten years professional experience in design and typesetting. From newspaper and glossy magazine production, to websites, product packaging and vinyl vehicle livery including professional photography and image editing to the highest standard.

Design Responsibilities

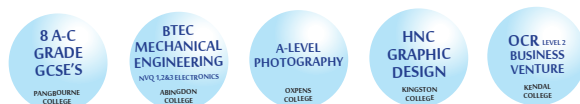

In the ten plus years of working as a graphic designer I have been responsible for liaising with clients and writers, meeting tight deadlines and preparing artwork for print.

Problem solving in deadline time restraints is key. I pride myself in always finding a solution to a design problem or software bug in time and to the high standards I work to.

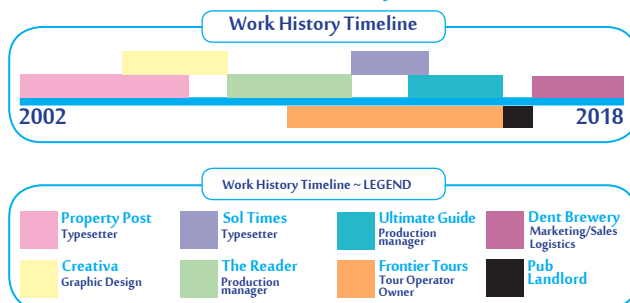

Having a keen eye for identifying exactly what your client expects and working with your colleagues to maintain consistency across multi media projects is crucial.

Education

rjdphotography.co.uk

As well as being a graphic designer I am a father of two boys with a passion for photography and more recently, movie-making. I also play the guitar, brew beer, love to travel and have a keen interest in 20th century modern history.
